

Explanation

Mineral Survey 12787 A and B were plotted based on the mineral survey plat dated January 13, 1899. The approximate position of four corners of MS 12787 B and two corners of MS 12787 A are marked on the ground by a 2x2 wooden post, along with a tag describing the corner, and also marked APPROX. The approximate corner positions are based on several cairns found in the field and on the position of the mine tunnel on the Lost Treasury Ex., as shown on the mineral survey plat. NOTE: This is not a survey. This is only an approximation of corner positions.

- Found Cairn
- MS 12787 A and MS 12787 B
- Set 2x2
